## In Unity There Is Strength

May 23, 2007

### 2007 OFFICERS

President  
Chief Arthur M. O'Neill  
Mansfield

1st Vice President  
Chief Anthony J. Riello  
Pittsfield

2nd Vice President  
Chief Terrence M. Cunningham  
Wellesley

3rd Vice President  
Chief Mary Lynne  
Mattapoisett

Sergeant-at-Arms  
Chief Mark E. Leahy  
Northborough

EXECUTIVE COMMITTEE  
Chief John J. Thomas  
Troy (Barnstable & Islands)

Chief Richard B. Wilcox  
Stockbridge (Bedfordshire)

Chief Carlton E. Abbott, Jr.  
Freetown (Dorchester)

Chief Kevin Barry  
Newbury (Essex)

Chief Gary M. Shillia  
Northfield (Franklin)

Chief Robert D. Campbell  
Agawam (Hampden)

Chief Charles L. Scherpa  
Andover (Hampshire)

Chief John W. Suslak  
Lynn (Middlesex City Chiefs)

Chief Edward P. Devora  
Watertown (Middlesex)

Chief Richard E. Smith  
Worcester (Middlesex)

Chief Kevin J. Meira  
Milford (Norfolk)

Chief Lincoln W. Miller  
Marion (Plymouth)

Chief Frank J. Gervin  
Chelsea (Suffolk)

Chief Peter P. Rostky  
Leominster (Worcester)

Chief Patrick T. Foley  
Douglas (Worcester)

Life Member  
Chief Joseph N. Perritano (Ret.)  
Winchester

The Honorable Kevin J. Martin, Chairman  
Federal Communications Commission  
445 12th Street, S.W.  
Washington, DC 20554

RE: PS Docket No. 07-8; CC Docket No. 94-102; WT Docket Nos. 03-264; 06-150, 06-169 and 96-86; EB Docket No. 06-119.

Chairman Martin:

The Massachusetts Chiefs of Police Association (MCPA) is the oldest police association of its kind in the United States with a long and distinguished history of service to its members and the Commonwealth. We understand the needs of Public Safety and ask that the FCC make those needs a priority in the upcoming 700 MHz auction.

The nation's communications systems in the field supporting Public Safety are not operable and this is unacceptable. First responders have known for years - Public Safety's separate systems cannot talk directly to each other. With the attacks on the World Trade Center, and hurricanes Katrina and Rita we've seen how vulnerable the country can be when communications are hampered. In Massachusetts we have severe weather including hurricanes, floods and blizzards as well as a myriad other emergency situations that come with little or no advance warning and we certainly want communication capabilities that a hardened Public Safety wireless broadband network would maintain. Our first responders require communications system that will not fail us.

The FCC's planned auction of frequency spectrum in the 700MHz band presents a unique and timely opportunity to join with allied partners, both public and private, to increase the quantity of available frequencies for first responder data communications and provide an opportunity to build a wireless broadband Public Safety radio communications network.

MCPA requests 10MHz of the 700MHz band currently scheduled for auction by the FCC under the DTV transition act should be made available under rules that require the winner of the auction to have a binding agreement with Public Safety for its participation in the National Public Safety Broadband Network as a prerequisite to receiving their license.

#261 P. 002/002

MCPA requests that the FCC license Public Safety's 700 MHz spectrum to a stand alone entity consisting of Public Safety leaders who will control the network and ensure it will be built to the standards of reliability and redundancy that Public Safety requires. *It is critical that the FCC place Public Safety in charge of the National Public Safety Broadband Network.*

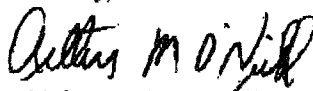

The National Public Safety Broadband Network must be built out so that it will reach rural and underserved areas. Public Safety – and those we protect - must have access to a “universal” system. Furthermore, Public Safety must have access to a satellite overlay to extend the reach of Public Safety's network to cover areas where a terrestrial build is non-economic and as a back up in times a disasters when existing infrastructures are unavailable.

The National Public Safety Broadband Network must be kept “evergreen” enabling the system to remain competitive on the commercial side and while ensuring the highest level of technology to Public Safety users.

Finally, to provide assurance that the network would have the resources to quickly construct and operate a fully deployed network, government loan guarantees are an appropriate model for supporting the public/private enterprise.

MCPA applauds the FCC for taking this important step towards creation of the National Public Safety Broadband Network and in so doing, the MCPA respectfully requests the FCC ensures through its crafting of rules that the interests of Public Safety come first. Our nation's first responders and the lives of those they protect demand nothing less.

Sincerely,

Chief Arthur M. O'Neill  
President
